Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 22, 2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nonogaki (6,363,266) in view of Takagaki (US 6,871,048).

Regarding Claim 3, Nonogaki teaches a mobile phone powered by a battery having a telephone function and a function for producing music sounds (Cols. 1 lines 6 – 9, 3 lines 1 – 6, line 21), the mobile phone comprising: means for determining whether a level of battery capacity is lower than a threshold level for permitting operation of the music sounds producing function (Col. 10 lines 11 – 24); means for terminating

Art Unit: 2618

operation of the music sounds producing function while the music sounds are being outputted when the battery capacity becomes lower than the threshold level to thereby maintain the telephone function (Col. 10 lines 11 – 24, the Nonogaki invention renders a scenario in which the music sounds stop being reproduced when the battery remaining capacity is insufficient); and means for informing a user that the music sounds producing function has been terminated (Col. 10 lines 11 – 24, when the music reproduction function is disabled there will be no music sounds, which is an indication that the music reproduction function has been disabled).

Nonogaki does not teach an outer terminal for connecting an earphone.

Takagaki teaches an outer terminal for connecting an earphone (Col. 3 lines 61 – 67, in order for the earphone to be connected to the mobile phone a terminal will be needed).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the mobile phone of Nonogaki with the earphone configuration of Takagaki as an alternative means for outputting the music to the user.

Conclusion
